PROJECTS

Blog by Ice ([GitHub](#))

Built a dynamic blog website with a clean, modern interface, allowing users to create, edit, and manage posts. Implemented a full-stack solution with a Node.js backend and MongoDB for database management.

Technologies used: **React.js, Tailwind CSS, Node.js, MongoDB**

Full Stack Developer Portfolio UI Design ([View Prototype](#))

Designed a modern and visually appealing UI for a full-stack developer portfolio using a bento box layout. Leveraged Figma for wireframing and prototyping, focusing on user experience and clean design aesthetics.

Tools used: **Figma (Wireframing, Prototyping), Bento Box Layout**

Mobile Sign up flow UI Design ([View Prototype](#))

Designed a modern and visually appealing UI for a mobile app sign up flow. Leveraged Figma for wireframing and prototyping, focusing on user experience and clean design aesthetics.

Tools used: **Figma (Wireframing, Prototyping)**
