

Siddhi Kothekar

7819817469 | svk280105@gmail.com | 172, Moreshwar Apartment, Shivaji Nagar, Dharampeth Extension Nagpur , Maharashtra

Education

B.tech Shri Ramdeobaba College of Engineering and Management | Nagpur, Maharashtra
Computer Science and Engineering | 07/2026

Completed 12th from St. Ann's Sr. Sec. School , Roorkee with **92.2% in CBSE Board**

Work History

Text Summarization

- **Project Objective and Scope:** "Developed a machine learning model using TensorFlow to classify sentiment in customer reviews with an accuracy of 85%"
- **Technical Skills and Tools Used:** "Utilized Python, TensorFlow, and Google Colab to preprocess data, train deep learning models, and optimize hyperparameters."

Country Guide Project

- **API Integration & Dynamic Data Rendering:** Developed a dynamic country guide project by integrating the REST Countries API, fetching real-time data based on user input, and displaying detailed country information including the flag, capital, continent, population, currency, and languages.
- **Responsive Design & User Interface:** Designed a user-friendly and responsive interface using HTML5 and CSS3, ensuring optimal performance and visual appeal across various devices. Utilized grid layout for the search bar and structured data presentation for a clean and organized display.
- **Error Handling & User Feedback:** Implemented robust error handling mechanisms to provide informative feedback to users, including messages for empty input fields and invalid country names, enhancing the overall user experience and app reliability.

Art Landing Page

- **Responsive Web Design & CSS Animation:** Developed a fully responsive landing page using HTML5 and CSS3, incorporating CSS animations and transitions
- **Visual Aesthetics & Content Organization:** Designed a visually appealing layout with consistent color schemes, typography, and well-structured content sections. Created engaging image galleries and informative sections to effectively showcase various art forms.
- **Technical Implementation & Accessibility:** Implemented CSS Flexbox for efficient layout creation and used CSS keyframes for smooth scrolling animations.
